

# *Enterprise Suite Scheduler*

## *Seamless Enterprise Wide Scheduling!*

## Enterprise Scheduling Summary

The Enterprise Module is designed to provide seamless schedule creation for facilities or enterprises that create unique schedules for each department or unit and also utilize a centralized schedule. After each department schedule has been created the schedule assignments are automatically available centrally to support assigning additional PRN staff, float staff and to fill schedule openings real time. In addition, customized house-wide daily staffing sheets can be printed in seconds.

## Increase Communication

- ➔ All assignments are updated automatically between the department and central schedule to ensure staff assignments are accurate and up to date
- ➔ Provides immediate access to the entire facility's staffing roster
- ➔ Float staff according to qualification, ensuring full utilization of FTE's throughout the facility
- ➔ Print department specific schedules from the central schedule in seconds
- ➔ See at a glance all openings throughout the facility

## Save Time and Money

- ➔ Eliminate all manual transposition of department schedules into a central schedule
- ➔ Print custom house-wide staff assignment sheet in seconds
- ➔ Post and fill openings across the facility with available cross trained part-time and full-time staff
- ➔ Ensure the best person is selected for openings—reducing overtime or use of agency staff
- ➔ Adjust staffing to meet census, acuity and staffing calls

## Eliminate Errors and Omissions

- ➔ Eliminate the risk of transposition errors or omissions of assignments
- ➔ Automatic update of schedules ensures all assignments are considered when filling openings
